19 November 1963

**MEMORANDUM FOR: Deputy Director (Science and Technology)**

**SUBJECT : Daily Activity Report - 19 November 1963**

1. SATELLITE ACTIVITIES: No change. Next launch 27 November.
2. BRASS KNOB: Mission 3776 landed 18/1230 EST. Estimate 9% coverage; no reaction. No mission scheduled for 19 November 1963.
3. EDWARDS AIR FORCE BASE: Second class of pilots entered carrier training at Monterey, NAS, 18 November 1963.
- 25X1C 4.  Training and aircraft test flights.
- 25X1C 5.   missions complete  
25X1C and the unit will begin redeployment to Edwards Air Force Base today. The  
25X1A U-2 and KC135 will depart  19/1800 EST and are scheduled to  
arrive at Edwards Air Force Base 21/1806 EST.
6. OX CART Flights, 18 November 1963:
  - a. Aircraft #124: Flight 166; duration - 1:18 hours; purpose - training.
  - b. Aircraft #125: Flight 32; duration - 56 minutes; purpose - training; maximum Mach - 2.35; maximum altitude - 71,500 feet. Flight normal except both engines apparently flamed out during descent. Engines restarted without trouble. Report implies this may have been caused by below minimum rotor speeds resulting from inability to read instruments due to extreme glare from afternoon sun.
